

# NewBabyCare

## Birthing bed

**Taking care**  
from the beginning

# NewBabyCare

## Birthing bed

The NewBabyCare labour, delivery and examination bed provides a more comfortable birth throughout all stages of labour.

- ◆ We aim to **ensure the mother's and newborn's health** while making everyone feel at home, supporting each couple emotionally on their journey, so that **every moment is truly special.**

The ability to change position in one and the same bed provides optimal comfort to the mother.

Accessibility for hospital staff from different sides of the bed, improving their works.

# Ergonomic, mobile safe bed

- ◆ We work daily with all the necessary
- ◆ **technology** to ensure that all
- ◆ birthing women enjoy a **unique delivery experience** that meets their expectations.

This bed is designed focusing on ergonomics, optimum safety, mobility and comfort for the expectant mother and the newborn.

Reliable and practical for the hospital staff while in use, this bed supports the care of the birthing woman.

## Rigid mattress platform

Independent and removable fireproof HPL bed bases. Extra protection on the middle section with easy to sanitize sanitary plastic.

## CPR system on double-sided

Quick-action double-sided manual system for positioning the backrest section in the event of a cardiorespiratory emergency of the patient.

## Easy and safe transfer

Set of 150 mm servo-steered castors with central braking system, easily accessible even from the sides.

## Split side rails

Minimum bed height in combination with the design of the side rails make it easy for the mother to get out of the bed.

In addition, the side rails can be folded down with a soft lowering system for an easy access by the hospital staff.

Antibacterial epoxy-polyester coated steel structure in compliance with ISO 22196:2011.

Designed so every movement is quick and simple

All stages of labour and delivery can be carried out from the NewBabyCare bed, thanks to the possibility to attach a number of accessories..

*Shorter time;  
fewer complications*

- ◆ Today, **large number of women**
- ◆ give birth once or twice in their
- ◆ lifetime. Pardo designed the NewBabyCare bed to make the childbirth experience a **magical and unique** moment to be remembered forever.

Double-sided guides allow fixing different accessories that ease both examination and delivery tasks.

### Gynaecological examination

The wide adjustment range of the footrests eases the midwife's work and ergonomics.

- ◆ Side handles.
- ◆ Footrest.

### Side position

Helps the mother relax from contractions, reduces the pain perineum and enhances blood flow to the uterus and the baby.

- ◆ Side handles.
- ◆ Gynaecological leg rests.

### Upright position with bar

The upright position with bar optimises the gravity effect and relaxes the pelvic area, thus facilitating the mother's labour.

- ◆ Grip frame.

### Pushing position

Ideal position for efficient pushing. Optimises the gravity effect and helps opening the pelvis.

- ◆ Side handles.
- ◆ "L" footrest.

# Easy control

- ◆ A **professional team** will be at your side throughout the birth and after delivery, so that you can safely and healthily enjoy your maternity.

Each of the bed's functions and its ergonomic controls ease the necessary procedures for all hospital staff.

- ◆ Patient and medical staff operation control with function-locking key to prevent misuse.  
Basic bed functions can be controlled, and the bed can also be set to Trend & Antitrend.

- ◆ The built-in lifting pedals allow staff to explore the patient safely and effortlessly while keeping in contact with the patient.  
The skin-to-skin contact offers the mother the necessary calm during labour and delivery.

## Did you know that **NewBabycare...**

Is equipped with three **IPX6** low voltage electro-medical linear actuators, allowing the articulation and different positions of the bed.

The lifting system of the bed base is very stable and heavy-duty, with a load capacity of up to **230 kg**.

At the press of a single button, the bed is prepared for emergency situations. The possibility of **Trendelenburg** positioning the mother, accelerates blood flow to the brain in the event of a syncope emergency.

◆ The accessories **trolley** allows optimal storage and easy access to all accessory parts. *(optional)*
