Seat height	Seat width	Seat depth
Weight	Patient weight	

Features

S-Class armchair is specially designed to give more comfortability to the companion in hospitals, clinics and nurse homes.

Some of its main characteristics are:

- Structure:

It has a resistant structure made of steel with epoxy-polyester coating that confers it corrosion protection.

The armchair has been designed with soft lines and rounded edges, without sharp edges and cutting surfaces to avoid any problem with cuts and scratches.

- Bed base:

Bed base made of wooden slats to make it more convenient and comfortable.

- Foams:

All the armchair is made by a monolithic polyurethane foam base (25 kg/m³).

This foam makes it fireproof according to normativa "Furniture and Furnishings (Fire)", BS

5852:2 CRIB2, UNE EN 597-1 y EN 597-2 regulation.

- Upholstery:

The foams are upholstered with latex-free vinyl fabrics, breathable, easy to clean, abrasion resistant, anti-fungus, antibacterial and fireproof M2.

- Transformable:

The armchair can be converted in bed with a bed base extension in the foot area, to become a 80x190 cm. bed.

- Legs:

It has four (4) legs for armchair support, with levelers below to adapt it to any surface.

- Cleaning:

Due to its great height of the bed base regarding the floor, this armchair allows cleaning without obstacles under it.

- Sections:

The armchair has a seat and backrest remova-

ble sections that allows greater uses as it can be transformed in bed.

Also the armrest is foldable, adapting a mattress function when the armchair is transformed.

- Dimensions:

The armchair is designed to be used by three people whilst seated and one in case he is sleeping, as it has 80 cm. width.

S-Class Armchair

Technical information

Total length (armchair)	1600 mm. ± 10 mm.
