

Density 100 Pediatric Mattress

+ Mattress characteristics

Mattress specially designed to be used on pediatric beds in hospital facilities, for children with medium ulceration risk (grade III according to Norton scale).

+ Core

- 1 High resilience flexible polyurethane foam core (30 kg/m³), whose open cells structure, AIRFLOW system and mattress perforations provide a high lightness; 10 cm. thick.

+ Core characteristics

- Fireproof core according to the “Furniture and Furnishings (Fire)”, BS 5852:2 CRIB2, UNE EN 597-1 and EN 597-2 regulations.
- Ergonomic mattress, keeps the body in his natural curved position, relieved, preventing the back and cervical pain.
- Reversible and symmetric core allows using indistinctly the head or feet areas.
- All foams are Oeko-Tex class I and REACH certified.
- Symmetric mattress allows using indistinctly the head or feet areas.
- Dimensions 60 x 40 x 10 cm.
- Supports up to 40 kg. In optimum conditions.

+ Technical specifications
